01

Why SXA

03

**Win - Win?
DEAL!**

05

QA - Thanks

02

SXA -> Headless SXA

04

Demo

01

Why SXA?

Why SXA?

- Multisite capabilities
- Page and Partial Designs
- Components OOTB
- Rendering Variants
- Themes
- Page Branches
- Shared the above resources across sites
- Site specific standard values
- Improved SEO, robots, redirects, sitemaps, error handling
- Site Scaffolding
- Grid and style
- Bootstrap and Tailwind support
- Advanced scripting
- OOTB in XM Cloud
- Asset optimizer

02

SXA -> Headless SXA

SXA -> Headless SXA

Not available in Headless SXA

- MVC Renderings
- SXA Creative Exchange and Theme
- Asset optimizer
- Search features
- SXA Snippets
- Cookie warning messages
- Site Metadata

Available in Headless SXA

- Experience Editor
- Headless development
- Smaller component library
- Page & Partial Designs, Page Branches
- Headless Variants
- Shared resources across sites
- Sitemaps, robots, redirects, error pages
- New site templates, clonings
- Grids and styles

03

Win - Win?
DEAL!

SXA with non-SXA

- Host SXA and non-SXA websites within single instance
- non-SXA site will be put in an SXA Tenant
- It's only one way solution - can't be reverted
- Shared SXA and non-SXA components
- non-SXA components won't have option for SXA features like grids, styles etc.
